

RestorixHealth and PMC National Healthcare Networks

ACCESS TO MORE PATIENTS • ADD NEW REVENUE STREAM • INCREASE MARKET SHARE

About Our Partnership

Practice Management Corporation (PMC) is a third-party administrator and healthcare delivery system provider with a focus on the Labor marketplace.

As one of the largest privately held provider networks to service the labor workforce, PMC's National Healthcare Networks division provides its approximately 60,000 members plus dependents with local access to the highest quality medical care available by contracted physicians, specialized programs and ancillary services.

Through our new partnership with PMC, RestorixHealth will now serve as the leading source of outpatient wound care services and will direct PMC patients to our partner outpatient hospital centers.

How Does This Work?

Our RestorixHealth team will work with our Hospital Liaison to implement this partnership and answer questions about becoming in-network with PMC.

PMC will work either directly or through contracted payors or administrators to refer PMC patients requiring wound care to your hospital's outpatient wound center.*

**PMC requires all patients requiring follow-up care in long-term care facilities and in-home wound care to be referred to a provider in the PMC network.*

**PMC shall serve as the purchaser and payor for all Cellular, Acellular and Matrix-like Products (CAMPs) purchased for its patients at participating outpatient centers.*

What Does This Mean for You?

Joining with PMC allows your hospital to become part of an integrated network of healthcare programs available to labor organizations, growing your patient population and expanding access to care for patients with wounds in your community.

**PMC PAYS APPROXIMATELY 145%
ABOVE MEDICARE RATES.**

**PMC PATIENTS WILL UTILIZE YOUR
HOSPITAL AS A PMC-DESIGNATED
PREFERRED LOCATION.**
